

DUAL

Technical Builders Risk

Tailored policies for hard-to-place business

As your partner in the builders risk market, we're your onestop shop for getting the tailored coverage you need. Our team of experienced and technical underwriters provides coverage for hard-to-place energy, civil infrastructure, renewable energy and heavy manufacturing projects.

Our Builders Risk team prides itself on providing individual broker account feedback on our underwriting appetite and deployable capacity within 24-48 hours.

Our appetite

- Focus on projects \$250m and smaller
- Basic civil infrastructure projects of road and bridge widenings or replacements
- Dams and reservoirs
- Water treatment facilities
- Pipelines
- Renewable energy
- Solar and BESS
- Hydrogen filling stations
- Electrical substations
- Natural gas facilities, chemical plant expansions, terminals or tank farms
- Single location equipment installations such as adding production lines to an existing process
- Heavy industrial and manufacturing projects – new, additions or major equipment installations
- Midterm projects
- Cost of making good wording acceptable but not full LEG 3/ 96 or 06
- \$25,000 minimum premium

Capacity deployment

- We expertly provide both lead and follow quotes with up to \$32.5m of technical risk capacity
- Per risk capacity up to 100% of any civil, energy or renewable energy project
- Ability to both lead and follow approved markets and forms, and we can deploy our full line regardless of the capacity offering the lead
- Average per account capacity deployment for technical projects is dependent on values, quality of contractor and spread of risk
- 36 month term maximum

Excluded classes

- Wind farms
- Offshore rigs and drilling
- Bridges over navigable water
- Transmission and distribution electrical lines
- Tunnels and micro-tunneling
- Structural renovation projects
- Earthwork only
- Hot testing only
- Alaska and Hawaii
- Limited Tier 1 named windstorm
- Prototypical, used, or refurbished equipment
- Nuclear or radioactive sites

Distribution

Technical risks and mass timber projects can be distributed by both retail and wholesale agents by specific appointment approved by DUAL.
